ECO-FRIENDLY NEWS YOU CAN USE

### CABINET ECO-CHIC

Kitchen in need of a face-lift? AyA Cabinet Studio has cooked up a line of cabinetry—the EVO™ collection—that's both stylish and considerate of the environment.

Paying mind to indoor air quality, the company does not add urea-formaldehyde to the 100-percent post-industrial recycled wood of the cabinets' plywood and particleboard. (The U.S. Environmental Protection Agency has cited possible health risks associated with offgassing of urea-formaldehyde and other chemicals.) In addition, the company reports that cabinet finishes,

including a UV-cured top coat, do not emit hazardous air pollutants.

For its positive eco-endeavors, AyA Kitchens has been certified by the Kitchen Cabinet Manufacturers Association's Environmental Stewardship Program and the Forest Stewardship Council (FSC); FSC promotes responsible management of the world's forests.

For more information about EVO cabinetry, call AyA Cabinet Studio in Scottsdale at (480) 998-4292; to locate other showrooms, call (866) 292-4968. To see more examples, go online to [ayakitchens.com](http://ayakitchens.com).

### DIDJA KNOW?

Homeowners who opt for green remodeling modifications, including energy-efficient appliances and programmable thermostats, can lower their residences' energy consumption by 30 to 50 percent.
