above Reminiscent of fine antiques made a century ago by master craftsmen, AyA Kitchens infused Shaker tradition into this custom townhouse in Oakville. Elegant, simple and functional, this kitchen is defined by the Plymouth door style and clean lines, and complements the contemporary feel of the rest of the home. One element that really makes this kitchen pop is the use of texture. By using a wide range of materials – a wide stone pillar, stainless

steel appliances and sleek glass backsplash – AyA was able to create a cool yet comfortable space. The home's open-concept floor plan allows for the use of larger architectural forms, some of which include the wide plinths supporting the stone countertop of the central island. This style is also repeated on the six-inch base pullouts on either side of the range, and as an added bonus, serve as storage for kitchen necessities. **HD**
